Category:Electric power in Europe Category:Lightning Category:Safety engineeringQ: How to overwrite magento's static block in mail template? I am using Magento 2.2.3 and would like to set the \$html variable in mail.phtml. I need to overwrite the value of this variable from a custom block that i use in my custom theme. Can anyone tell me how to do this? A: Use below solution : You can overwrite block in file like vendor/magento/module-email/view/frontend/templates/email/header.phtml. Please override file like this.
/app/design/frontend/[Vendor]/[Theme]/Magento_Email/templates/email/header.phtml Q: Help please with C# range validation I am new to C# and I am looking for a little help, As in the following code: if (textBox1.TextLength > 18) { MessageBox.Show("Please enter a nickname name"); textBox1.Text = ""; return; } I was wondering how I can rewrite it to use a variable for the number, f678ea9f9e
